

NFL Winning Margin Betting Guide - SmartBettingGuide.com

When you place a bet on the NFL, you will be pleased to know that there are some fantastic betting markets available for you to use. The choice for NFL punters has grown considerably over the past few years, and it is at the stage now where it is as good as it has ever been. One of the ways you can bet on the NFL is to back the winning margin of a game, this gives you an alternative if you are looking to back a team to win in a single game but you want to increase the odds that you are taking.

Winning margin betting is available in a few different ways, each market works slightly differently and each one has its advantages depending on the situation and type of bet you are wanting. If you haven't placed a winning margin bet before on the NFL and you are looking for something new to try then here is our guide, giving you everything you need to know about winning margin NFL betting. If you want make your NFL betting with bitcoin, here you will find best bitcoin bookmakers sites 2022.

NFL Handicap Lines

If you wish to place a bet on a team to win by a certain number of points or more, with no upper limit, then the best way to do this is to bet on the NFL handicap lines. Alongside offering the main handicap line, many bookmakers will also offer alternative lines so you can pick the one you want, either increasing or decreasing the odds to give yourself more or less chance of winning.

For example, if the regular NFL betting handicap line is -4 and you think the team are capable of winning by a much bigger margin than that then you can go for a bigger handicap line such as -8, which will increase the odds on your selection.

The key when using this line is finding the handicap betting NFL line you are happy with combined with the odds you want. If you want bigger odds you will need to increase the line that you take, needing your team to win by a bigger margin, while if you are happy with smaller odds you can take a lower line to give yourself more chance of landing a winner.

The great thing about this way of betting a winning margin is that you can pretty much choose the line you take if you bet with a bookmaker that offers alternative NFL lines. This means you are picking your own line and odds, and you can change this depending on how much you fancy the team to win and how easily you think they will do it. When you are betting this way, you are in control and there are not many betting markets that allow you to do that, this is one of them.

Winning Margin Betting

The official winning margin betting markets vary between the US sports bookmakers. Again, if you choose to bet with one of the best bookmaker NFL you will have more choice in front of you, and you will be able to try and match your exact thoughts on the game with a bet to place.

There are different winning margin betting markets you can use, some bookmakers will only offer one while there will be some other bookmakers who offer two or three. The difference is the number of outcomes, though the one thing they all have in common is that the biggest result will include anything bigger than a certain number, so for example, the biggest outcome will be a margin of 20 or more points.

Before that, the number of outcomes in the market will be determined by how big the point spreads are.

For example, a market with more outcomes would offer you the chance to bet on winning margins of 1-5, 6-10, 11-15, 16-20 and 20 or more. With this being available for each team, plus the option of a tie and no winning margin, this is an 11-way betting market, five options for each team and the middle draw option.

The other way these markets are done is with a smaller number of betting options, For example, winning margins of 1-10, 11-20 and 21 or more for each team, plus the draw. This would make it a seven way market.

The differences between the two are that you will get bigger odds on the first market with more betting options, but it is tougher to get the winner while you will get smaller odds on the second market but a better chance of winning as more points are covered by each option.

Just like with the handicap NFL betting lines above, you can choose which type of market you wish to use depending on the type of bet you are placing and the odds you are looking to get. For example, if it is just a small stakes single you are placing for interest, you are likely to opt for the bigger odds that are on offer for this bet.

However, if you are looking to place a bigger bet and want to increase your chances of winning then the second market is likely to be better for you, with few options to choose from and more coverage for your bet.

What is Winning Margin meaning?

By placing a bet on Winning Margin market punter is trying to predict how many goals the chosen team will win by. This is the goal difference between the two team, for example if the chosen margin is 2 goals, the team must win 2-0, 3-1, 4-2 and so on so forth.

This is usually displayed with the team names first followed by how many goals they will win by (The margin). Majority of the time there is also the possibility of the draw option on the betting markets. You only have two options with the draw however, that is either draw 0-0 or score draw which means a draw regardless of how many goals, as long as there are goals.

Winning margin by 1 goal – Rules

When you see it stating Win Margin +1 (Or other numbers) you will notice that this has to be the difference between the score lines. Be aware that even though some matches may go to extra time and penalties, majority of the time this bet only counts within the 90 minutes of the match. This is also very similar to the +3 winning margin concept, however the dividends is smaller. Lets say Burnley are playing Wolves and you bet Burnley to win by +1, you would need the score lines to be no more than +1. Such as 1-0, 2-1, 3-2, etc.

Winning Margin predictions + Top Tips

The first bit of advice that we will give you for winning margin, is to be patient and wait for some of the games to pass first. Attempting to predict the winning margin at the beginning of the season is very tough, this is due to the fact that nobody has played any games yet, so you don't know what type of form they are on. If you wait until at least a few games have passed, you can begin to do some research in to the squads.

The stats don't lie is a great site for getting an understanding on what teams to bet on. The site gives in depth detail of each team from across the globe in order for you to know who is most likely to score and win. Predicting the winner is much easier than predicting the score, this is why we encourage you to do some research before placing your bet. In the table below is an example of some of the information you can find on the site.

As you can see from below, this is what the table would look like once the league starts for the Premier League. This will help give you an idea, obviously there are no stats yet as the season hasn't begun.

It's also key to note player news. Sky sports is a reliable and fast way of discovering transfers of players and injury news. This information is key because if a key player, who's a striker or defender is out or has moved to another club, this could essentially affect the correct result of the match. We recommend that if you do place a wager on winning margin, do it on teams you are familiar with.

It's also recommended not to go to crazy with it. It's important to note that the chance of a winning margin being 4 and above are low. Not to say that it won't happen, but the chances are very low hence why the odds are so high for it. Be wary when deciding this, especially if you are betting on top 6 teams against each other.

- Check past results between the two teams to see if they have been high scoring or not
- Check team news in case of any injuries or suspension that players may occur
- See how the teams are doing in the league regarding results league positions
-

Pros and cons:

Pros and cons might not be the most technical terms to summarize this category, but our aim is to make sure you know why experienced punters will bet on it, and why others wouldn't touch it with a barge pole. So without further ado check out what are Winning Margin Pros and Cons.

Pros.

- Odds are much higher than other markets
- Not needing to select exact score, only the amount the team will win by
- The cash out is usually very generous if bet is winning
-
- With in play stats, an in play bet can also be on the cards

Cons.

- Chances of predicting high margins are very low
- Research must be done if wanting to win consistently
- Don't necessarily need to stake high to win high, but if just a single bet then yes depending on the teams
- An example would be if Arsenal are playing against Chelsea and you bet Arsenal to win +3, this means the possible score lines for you bet to be successful would be 3-0, and above, 4-1 and above, 5-2 and above, etc. As long as the difference between the two score lines are three or above in favour of the team you back, so in the case, Arsenal

Conclusion

Conclusion

Winning margin is not just about being able to predict the outcome, or at least the difference between the two teams. It's also about being brave and showing a bit of initiative towards betting, because realistically, that's how you can get paid well.

Winning Margin: Win By Margin Betting Explained

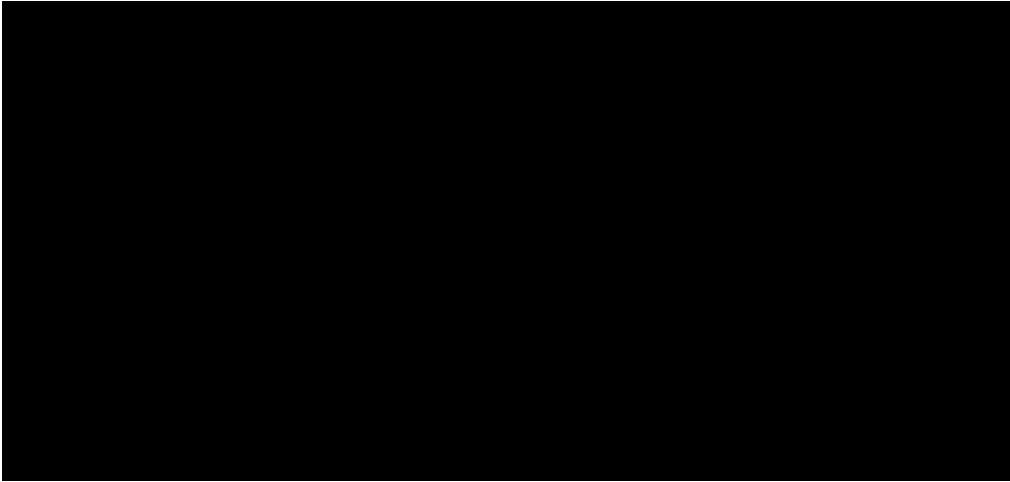

A winning margin prediction is a goal betting market. It is reliant on wins and goals scored by a football team. This betting market has very high odds because the two events, goals, and a win must simultaneously fall in place for your wager to stand.

Which markets are available in winning margin bets?

Here is a Premier League fixture between Brighton and Crystal Palace.

It is a very tough game considering that parties are average teams. A three-way prediction can be very tough, and with the few odds, winning margin betting is a perfect alternative.

- **Winning margin 1 (Brighton @ 3.40 odds / Crystal Palace @ 6.5 odds)**

When you place a home team or away team win by one margin, the designated team must win by one goal. In this case, a Brighton to win by 1 margin means that Brighton must win the game with a goal difference of 1 goal. At the end of the game, the scoreline does not matter so long as the goal difference is one. The examples of winning score lines for Brighton win by 1 margin are: 1-0, 2-1, 3-2, 6-5.

Likewise, if you place a Crystal Palace win by 1 margin, the away team must win the game with a final goal difference of one goal. Here are examples of winning score lines: 0-1, 1-2, 6-7, 4-5.

- **Winning margin 2 (Brighton @ 4.75 odds / Crystal Palace @ 17.00 odds)**

A win by 2 margin is a goal betting market that dictates that the team you placed a bet on must win with a goal difference of 2 goals. The odds are higher than the win by 1 market since it is more demanding and complex. If you placed a Brighton win by 2 goals margin, Brighton must win the game with a 2 goals advantage. With 4.75 odds, it is a risk worth taking because there are high chances of Brighton winning this game.

On the other hand, Crystal Palace win by 2 goals margin, means that it must win the game by exactly 2 goals. Examples of winning scores are: 1-3, 2-4, and 3-5.

- **Winning margin 3 (Brighton @ 9.50 odds / Crystal Palace @ 51.00 odds)**

A win by 3 margin means that your team must win with a 3 goals winning advantage. If you placed a Brighton win by 3 margin, Brighton must win the game with three more goals than Crystal Palace. The winning score lines for this bet are: 3-0, 4-1, 5-2 and 6-3. A Crystal Palace win by 3 margin is the vice versa, and the possible winning score lines are: 0-3, 1-4, 2-5 and 3-6.

- **Winning margin 4+ (Brighton @ 17 odds / Crystal Palace @ 126 odds)**

This betting market dictates that for you to win your wager, your team must win the game with a goal difference of 4 or more goals. For a home team with 4+ winning margins the sample winning score lines are; 4:0, 5:0 and 7:1; the vice versa is a 4+ away team winning margin.

- **No goal/Score draw**

No goal means that the game will end with zero goals. The only score that can win you money in this bet is 0-0. On the other hand, score draw examples are 1-1, 2-2 etc.

Note: In some betting sites, for example 1XBET, the winning margin market is represented by 'WIN BY'.

Here's an example of Sporting CP vs Man City:

What is a 4-way winning margin? | Betting Rex

Categories: | Published by: Rex

05/05/2020

4-way winning margin bets mean that there are 4 outcomes to a given bet. For example, if Bernard Tomic is playing Milos Raonic in a tennis match, the 4-way winning margin market can look something like this:

- Tomic to win with a 1 set winning margin,
- Tomic to win with 2-3 sets winning margin,
- Raonic to win with a 1 set winning margin,
- Raonic to win with 2-3 sets winning margin.

Winning Margin Bets - What is a Winning Margin 4 Way Bet?

One bet you may encounter at legal online sportsbooks — particularly for popular sports — is a four-way winning margin bet.

You may decide to go with a winning margin wager for a few reasons, but the idea is to increase the potential payout for a winning bet. The catch is that with more options to choose from, your bet is less likely to win.

Below learn the basics of four-way winning margin bets with examples using California-based teams, get tips on this particular bet and more.

4-way winning margin bets explained

With a point spread bet, sportsbooks will release a specific number for you to place money on. If a team is a five-point underdog, you can bet whether the underdog will perform better or worse than the spread number.

With a 4-way winning margin bet, you'll have four outcomes to choose from for the final score—double the standard options of a point spread bet.

It gets a little more complex with a winning margin wager, as sportsbooks will provide a range of numbers for you to bet on. For example, the options could include a team winning by one to 10 points or by 11 or more, and you could make the same bets for the opponent.

The sportsbook odds will reflect the likelihood of all four outcomes occurring.

Examples of winning margin bets

Now that we have the basics of four-way winning margin betting down, here are some examples of what you might see on a top California betting app:

Basketball winning margin bets

In this scenario, let's say it's the Los Angeles Lakers vs. the Sacramento Kings. The Lakers are 1.5-point favorites on the point spread, but you want to increase your potential payout by making a bet on the winning margin. Here is what a four-way winning margin bet could look like:

- Los Angeles Lakers 1-10 (+185)
- Sacramento Kings 1-10 (+200)
- Los Angeles Lakers 11+ (+360)
- Sacramento Kings 11+ (+430)

With the points spread showing the Lakers to be 1.5-point favorites, the most likely scenario would be the Lakers to win by one to 10 points, which is what the odds show. The reason to pick that option instead of taking the point spread bet is because of the increase in odds due to the additional options for you to bet on.

If you bet on the Lakers to cover the 1.5-point spread with the standard -110 odds, a \$110 wager would return \$100 in profit if correct. A \$100 bet on the Lakers team at +185 odds, meanwhile, would offer a potential \$185 return. As you would imagine, the Kings winning this game by 11 or more points is unlikely, which is why you would get +430 odds on such an outcome.

Baseball winning margin bets

The winning margin range in a baseball game will be significantly smaller due to the overall lower scoring in the sport compared to basketball. Here's what this bet could look like in a game between the Los Angeles Dodgers and San Francisco Giants, with the Dodgers odds showing them as slight favorites.

- Dodgers by 1-3 runs (+135)
- Giants by 1-3 runs (+200)
- Dodgers by 4+ runs (+390)
- Giants by 4+ runs (+500)

If you have researched the matchup and think it is worth the risk to bet on the Giants to pull off the upset with a blowout victory, placing \$100 on the Giants to win by four or more runs at +500 odds would result in a \$500 profit if you ended up winning.

Check out our San Francisco Giants odds for more baseball betting opportunities.

Quarters/halftime winning margin bets

The examples so far have involved betting on the full game, but some sportsbooks may offer winning margin bets on halves and quarters. Before a game starts, there could be odds available for what the winning margin will be at halftime or for the first or third quarter, depending on the sport.

Live betting on the winning margin

Thanks to live betting, you do not even necessarily have to get your winning margin bets in prior to the start of a game, as you can pull out a phone and bet via a sportsbook app from wherever you are while the game is going on — providing you are in a state where sports betting is legal. The odds will move to reflect what is happening in the game, and you could have a number of betting options when it comes to betting on the winning margin.

Other variations of winning margin bets

Additionally, there are a number of winning margin bets outside of the four-way option. Examples include three-way, seven-way, 12-way, etc. winning margin bets, which are just like the four-way option with a different number of things you can bet on.

There could also be options where sportsbooks offer odds on the exact winning margin. For example, if you decided to bet on the Lakers by four, they would need to win by exactly four points for your bet to win. While that may seem like fun, such bets are tough to win, so exercise caution.

Key numbers in winning margin bets

Depending on the sport, key numbers can be an important concept in sports betting. The idea is based on historical data that shows how often a game in a particular sport will end with a certain margin of victory.

This is most important for betting on football. Because of how scoring works, margins of three, six, seven, and 10 points are most common. If you make a winning margin bet on the NFL, keep those numbers in mind.

Line shopping for winning margin bets

While many sportsbooks will offer odds that are similar, they won't always be exactly the same. If there's a bet you want to place, and one sportsbook gives it odds of +185 and another has it at +195, you would take the book offering +195 odds to give yourself more profit if the bet wins.

This may seem like a small thing, but the key to sports betting is identifying small edges you have over the sportsbooks, and this is one way to do so.

Is winning margin betting a good strategy?

It is possible you could occasionally find some value in a winning margin 4 way bet, but this type of betting is generally not conducive to winning consistently.

Getting more than 50% of your bets correct is tough enough if you are picking between two outcomes. Adding more choices just makes it even more difficult. Sportsbooks understand this, which is why they are comfortable releasing winning margin odds for a variety of sports.

However, it is your money, so if you have done your homework and think you have a good idea of how a game will play out, feel free to occasionally pull the trigger for a chance at a higher payout with a winning margin bet. Just understand the potential limitations this strategy has long-term.

Betting on the winning margin of matches is something very popular with punters these days. A winning margin bet is actually the goal or points difference with which teams win matches. For example, if a football match finishes 2-1, the winning margin is one goal. If the match finishes 4-2, the margin is two goals.

As you can see, this is quite easy to understand but can be a little tricky to bet on. However, fret not as uncle Rex has got you covered. Just stick with me here, and you will get the low-down on where to bet and how to place that winning margin bet.

Winning Margin Betting Sites

To place a bet, you first need to find yourself the best winning margin betting sites. This is easier said than done as the search for the perfect bookmaker can get quite exhausting. Fortunately for you buddy, Betting Rex brings his readers instant access to a list of tried and tested bookmakers right here.

The sports betting sites that I vouch for are licensed by some of the most reputable regulatory bodies out there. What is more, I never put my name alongside a betting provider which doesn't give quality margin bets. Finally, an experienced punter such as myself would never put his reputation on the line for a bookmaker offering low odds. If you find a bookmaker here, it means it is safe, secure and boasts very high winning margin odds.

Winning Margin Betting Strategy

Finding a good bookmaker is half the job. Using the right winning margin betting strategy is the rest. Different punters utilize different strategies, but I always go for a more varied approach.

What I try to do to win a bet of this type is to use different strategies. Let me illustrate this with several examples. Imagine that Liverpool are hosting a much inferior team such as Sunderland in the FA Cup. Backing the home team to win with a winning margin of two, three or even four goals is just not profitable enough for me.

So instead of just backing Liverpool with a single bet, I put the Reds in an accumulator consisting of similar margin bets. This means that I include other favourite sides such as Liverpool and back all 6 or 7 of them to win with a margin of 2 goals or more.

In contrast, when I back two more evenly matched teams, I go with a single bet that I back with a large stake. This usually happens when I get some insider info regarding injuries or suspensions. For example, when Chelsea hosted Everton back in 2016, the visiting team came to Stamford Bridge without 7 or 8 first-team regulars.

This meant that the Blues attack led by Diego Costa and Eden Hazard would score many goals against the Toffees. I was sure that this would be a rout, so backed Chelsea to win with a four-goal winning margin. Needless to say, I backed that with a hefty stake. The match ended 5:0 in Chelsea's favour, and I enjoyed the spoils of my successful winning margin bet.

Winning Margin Tips

If you want to get the best winning margin tips, you have come to the right place. Most sports come with this type of market, so knowing how to make money from it can be of huge help.

Let's say you were betting on the first leg Champions League match between Atletico Madrid and Liverpool. Backing any of these two teams to win came with good odds. Atletico got odds of around 3.50 to win, while Liverpool had odds of 2.28.

These odds can be quite profitable, but I want my Betting Rex fans to get more for their money. Therefore I advised my followers who wanted to back any of the two teams to combine that with a one-goal winning margin.

I did this because I was certain that if there was a win in that tightly-contested match, it would be only with a one-goal difference. What's more, that winning margin bet also came with significantly higher odds.

That match proved me right as Atletico won a very close game which, you guessed it, was with a one-goal difference. The game ended 1:0, and my fans were the benefactors of high odds of 4.87. That's significantly higher than the original odds of 3.50.

Winning Margin FAQ

- What is the winning margin?

A winning margin is a goal or point difference with which a team wins a match.

- What is a 4-way winning margin?

4-way winning margin bets mean that there are 4 outcomes to a given bet. For example, if Bernard Tomic is playing Milos Raonic in a tennis match, the 4-way winning margin market can look something like this:

- Tomic to win with a 1 set winning margin,
- Tomic to win with 2-3 sets winning margin,
- Raonic to win with a 1 set winning margin,
- Raonic to win with 2-3 sets winning margin.

- What is winning margin in betting?

A winning margin in sports betting is when a punter bets on how big the winning difference will be.

- Margin in football is the difference with which a match is won. This can be a 1 goal difference, 2 goals, 3 goals or more.

Winning Margin Betting Explained with Examples

Winning margin betting involves wagering on the number of goals/points that a team will be winning by at the conclusion of the game/match.

How It Works

With winning margin betting you wager on how many goals a specific team will win a game by. You must correctly select the winning team as well as the winning margin.

Some sportsbooks also call this betting on the margin of victory or anything that indicates a team must win by a set number of goals.

Example

Let's look at an example from the MLB. In this case the winning margin would be runs.

Here is a margin of victory bet at Bovada.lv for a game between the Cleveland Indians and Chicago White Sox:

(CLE vs CHW) - Margin of Victory		
<i>Trevor Bauer (R)/Hector Santiago (L) must start. Must go 8.5 innings for action.</i>		
4:10p	Cleveland Indians to win by 1 run	13/2 <input type="checkbox"/>
	Cleveland Indians to win by 2 runs	15/2 <input type="checkbox"/>
	Cleveland Indians to win by 3 runs	9/1 <input type="checkbox"/>
	Cleveland Indians to win by 4 runs or more	17/4 <input type="checkbox"/>
	Chicago White Sox to win by 1 run	15/4 <input type="checkbox"/>
	Chicago White Sox to win by 2 runs	15/2 <input type="checkbox"/>
	Chicago White Sox to win by 3 runs	9/1 <input type="checkbox"/>
	Chicago White Sox to win by 4 runs or more	4/1 <input type="checkbox"/>

In this example you can see the different payouts associated with each winning margin outcome.

For example, if you bet \$10 on the Cleveland Indians to win by 2 runs you would win \$75 for a payout of \$85 if the Indians won the game by exactly 2 runs. If the White Sox win or and Indians win by any amount other than 2 then your bet would be lost.

Most Common Occurrences

MLB games are often decided by 1 run, which is why the 1 run margin of victories will most often have the lowest return. This is true in most other sports as well, including the NHL, the majority of competitive soccer games and more.

In the NFL and NBA you will often find ranges of victory that the team must win within instead of the exact number of points. Here is an example using the CFL game between Toronto and Hamilton to showcase this:

(Hamilton Tiger-Cats @ Toronto Argonauts) - Margin of Victory		
<i>Game must go 55 minutes for action. Overtime counts towards wager.</i>		
5:05p	Hamilton Tiger-Cats 1 to 6 points	15/4 <input type="checkbox"/>
	Hamilton Tiger-Cats 7 to 12 points	11/2 <input type="checkbox"/>
	Hamilton Tiger-Cats 13 to 18 points	9/1 <input type="checkbox"/>
	Hamilton Tiger-Cats 19 to 24 points	18/1 <input type="checkbox"/>
	Hamilton Tiger-Cats 25 to 30 points	25/1 <input type="checkbox"/>
	Hamilton Tiger-Cats 31 to 36 points	40/1 <input type="checkbox"/>
	Hamilton Tiger-Cats 37 to 42 points	80/1 <input type="checkbox"/>
	Toronto Argonauts 43+ points	66/1 <input type="checkbox"/>
	Hamilton Tiger-Cats 43+ points	66/1 <input type="checkbox"/>
	Toronto Argonauts 1 to 6 points	7/2 <input type="checkbox"/>
	Toronto Argonauts 7 to 12 points	4/1 <input type="checkbox"/>
	Toronto Argonauts 13 to 18 points	13/2 <input type="checkbox"/>
	Toronto Argonauts 19 to 24 points	10/1 <input type="checkbox"/>
	Toronto Argonauts 25 to 30 points	25/1 <input type="checkbox"/>
	Toronto Argonauts 31 to 36 points	40/1 <input type="checkbox"/>
	Toronto Argonauts 37 to 42 points	80/1 <input type="checkbox"/>

Are Winning Margin Wagers Sharp Bets?

In general the sportsbook will add extra juice to prop bets such as winning margin wagers. For this reason it is generally not the sharpest bet to make on a particular game.

That said there are times when winning margin bets make sense and will provide value to the player. For example, if you think that a pitcher is going to get lit up in an MLB game then it may be advantageous to bet on their opposition to win by 4+ runs.

There are situations where winning margin bets can be used to your advantage so it is helpful for you to understand this wager and how it works.
