Shane - Scribbr-editor
If you want to make your writing even stronger, try to avoid "there is/are" constructions; they are considered a bit too imprecise for academic writing. For instance, this could be reworded to "potential exists for large-area inkjet electronics fabrication."

inkjet-printed dielectrics are investig
polymer (poly 4 vinyl phenol), and a
nanoparticle ink and a custom in-ho
conductor. The focus is on passives,
frequency electronics, radio frequen
depth of the conductors and surface
the dielectric. These concern
